

2D Shape Sort

Sensory Bag

You will need:

Small Shapes

Shape Sorting Mat

Ziplock clear bag

Duct tape

Sticky tape

Clear hair gel

Glitter

Scissors

Laminator

Method

1. Cut out and laminate the Small Shapes. You may also choose to laminate the Shape Sorting Mat.
2. Squeeze some hair gel into the bag (not too much because then you won't be able to squish the shapes around).
3. Add the laminated shapes and some glitter to the bag. Remove as much air from the bag as possible, close the bag, and tape the top with duct tape so the gel and cut-outs don't seep out.
4. Tape the edges of the bag on to the Shape Sorting Mat.
5. Then the fun begins. Can the children move the shapes around the bag and in to the matching shape on the Shape Sorting Mat?
